

We owe a huge debt of gratitude to all those who helped over the holidays to finish off the school house ready for the new tenants. Stephanie Smith and Donna Faiers volunteered hours of their time to this project. Thanks also to Catherine and Scott Smyth, Sara Sulzberger, Maria Cameron and Linnet Hatton. The school house looks great both inside and out. Thank you all so much.

Mrs MacKenzie and her Room 3 students enjoyed making bread this week with the best part being the taste test! Lots of fantastic writing came out of this experience.

How to make bread.
The bread rises up. The little hen puts yeast and sugar in the bowl. I got yeast and warm water. It looked all bubbly. I put it in the oven. It was almost ready.
by Levi

How to make bread.
The little red hen planted the wheat and it grew and grew. The little hen cut the wheat. I put some flour and yeast and warm water in the mixture. I let the mixture go to sleep and cooked it in the oven. Then we ate it.
by Tom

The little green dinosaur planted the wheat and the wheat grew. Then the wheat got bigger. Then the little dinosaur picked the wheat. I put some yeast in warm water with flour. I let the bread go to sleep with a t-towel.
by Del-Ray

The little red hen planted the wheat and she waited and waited until it grew. When the sun was here and the rain came to feed the wheat the little red hen chopped the wheat. The ingredients are sugar and yeast. I put the yeast in the warm water. We kneaded and then punched holes in the bread and the mixture went to sleep so it would grow. Then we put flour and sugar in the bread. We cooked the bread in the oven.
